About

You get a developer who has actually shipped products that people use. 15+ years of professional experience across software engineering, 3D visualisation, and web development means I bring context most developers my level simply don't have. I write clean backend code in Node.js, C#, and .NET Core, and I can jump into the frontend when needed — so I never block a team. I've grown user engagement by 60% and improved system performance by 30% in real production environments. I think visually, communicate clearly in three languages, and I thrive in Agile teams where the goal is to build things that actually work.

Tech Stack

Backend Node.js · Express · Python · C# · .NET Core · Java · SQL

Frontend (hands-on) JavaScript · TypeScript · React · Vue · HTML · CSS

Tools & Workflow Git · GitHub · Figma · Vite · Jira · Agile/Scrum

3D & Visualisation Unity · Unreal Engine · 3ds Max · AutoCAD · C#

Experience

Software Engineer — SDR Style

Feb 2024 – Present · Copenhagen

Building responsive, performant interfaces and backend integrations with C#, JavaScript, and AI tooling. Improved system performance by 30%.

Software Developer — COBOD International A/S

Sep 2021 – Dec 2023 · Copenhagen

Developed a web-based application that increased user engagement by 60%. Integrated Unity and Unreal Engine into COBOD's visualisation pipeline, raising visual content quality by 90%. Delivered 6+ industrial animations for internal and external clients.

Unity Developer & 3D Generalist — Purple Scout

Jan 2020 – Jul 2021 · Copenhagen

Built and deployed modular 3D content for client Veltuff at an early-stage startup. Stack: C#, Git, SQL, .NET Core, Unity.

Unity Developer — Memorix

Jan 2019 – Nov 2019 · Copenhagen

Created low-polygon 3D environments for an AR/web learning app focused on visual memorisation techniques.

3D Visualisation Specialist — Chakad 3D Studio

Feb 2007 – Jan 2015 · Isfahan, Iran

Delivered architectural visualisation and spatial simulation to validate design before construction.

Education & Training

Backend Web Development — HackYourFuture (HYF)

Oct 2025 – Jul 2026 (expected)

9-month intensive programme. Backend: Node.js, Express, SQL. Frontend foundations: HTML, CSS, JavaScript ES6, React. Version control: Git, GitHub, Agile/Scrum.

Systemudvikling — KEA Copenhagen

Mar 2025 – Jul 2025

Software development fundamentals: system design, programming, introductory AI and machine learning, Jira.

Bachelor of Arts — University of Applied Science and Technology, Iran

2012 – 2015

Visual communication and design: branding, UI/UX fundamentals, typography, interactive design.

Associate of Science, Software Engineering — University of Applied Science and Technology, Iran 2004 – 2007

OOP, UML modelling, design patterns, system design. Improved system efficiency by 30% through optimised code.

Project Description Stack

[COBOD Configurator](#) Web + mobile app for configuring 3D construction printers. Unity · C# · Web
[Memorix AR App](#) 3D AR/web app for visual memorisation in education. Unity · C# · .NET Core
[Game Hub](#) Personal frontend project — game discovery interface. React · JavaScript
